

Imagine

Imagine's blimps provide unique and cost effective alternatives to traditional advertising methods. The Blimp advertising medium allows a business name, brand or product logo to become airborne, being visible from a distance of 3 miles away (4.8 km). It is a powerful advertising and marketing application with the ability to generate an instant increase in business for retail and consumer-based sites.

Imagine Blimp Specifications

Blimp 20 Specifications

1. 85 sq.ft. (7.9 sq.m.) advertising space available on each side. Detachable side panels also available.
2. Reinforced stress patch on nose.
3. Handling Straps (fore and aft.).
4. Rust proof inflation valve.
5. Strong durable polyurethane coated nylon fabrics, ultra violet light stabilised for minimum helium seepage. White fabric is standard. Colours also available.
6. Rigid fin construction - allows for colour changes, any easy replacement of damaged fins, - no need to deflate and return blimp to factory just for fin repairs.
7. Strong, flexible fibreglass bracing rods.
8. Lightweight rustproof nylon fittings.
9. Fast exhaust pipe for speedy deflation.
10. Two strong nylon tether lines. (No special winches needed).
